Dear Sir,

Pursuant to the aforesaid subject, we enclose herewith copy of the public notice of the Postal Ballot of the Company, instruction for e-voting and other related information, published **on 15th April, 2024** in:

1. Financial express (English Newspaper in English Language) and
2. Mumbai Laksdeep (Marathi Newspaper and in Marathi Language)

Further, the Company has also disseminated the above published information on the Company's website viz., www.jkumar.com.

Yours faithfully
for J. Kumar Infraprojects Ltd

Poornima
Company Secretary

Enclosures: As Above

OF THE HIGHEST ORDER

The blistering pace at Blinkit

AYANTI BERA
April 14

LAST MONTH, ALBINDER Dhindsa rolled out Blinkit's services in his home town of Patiala. It was a particularly special moment for the entrepreneur who had started out ten years back to build a business. Indeed, Dhindsa has much to feel good about because, over the past year, it has become abundantly clear that his bet on quick commerce has paid off. And he must feel even more satisfied that, with a market share that is nudging 40%, Blinkit now has a big headstart.

The doubts surrounding q-commerce, that had surfaced when Zomato bought Blinkit in June 2022 for ₹4,447 crore, have dissipated. Experts now believe q-commerce will outpace e-retailing; they expect this space to grow at a compounded 35% plus in the next few years on the current base of just under \$4 billion. On the other hand, the e-retailing market is tipped to grow at a compounded 25% in the next five years.

Not surprisingly, q-commerce services have also moved to smaller towns like Puna and Rajkot. As Sachin Salgaonkar of BofA Securities observes, companies have struggled to understand granular consumption patterns in the kirana market after the products left their distributor network. "Q-commerce offers hyperlocal insights and allows brands to specifically target high-end users," Salgaonkar points out.

The inherent strength of the q-commerce proposition puts Blinkit in a position from where it can scale up fast. Yogesh Aggarwal, head of research at HSBC India, estimates Blinkit's gross merchandise value (GMV) is likely to have nearly doubled in FY24. Zepto, which has a share of about 32%, is clocking an annualised growth rate of 100% or a run rate of \$1.2 billion.

Having established itself in the food and grocery segment, Blinkit is adding new categories to drive up the average order value (AOV) and improve its unit economics; in the process, it's hoping to retain more customers. Experts believe it is the addition of new general merchandise categories that has in fact pushed up Blinkit's AOV beyond ₹600 in the recent two-three quarters.

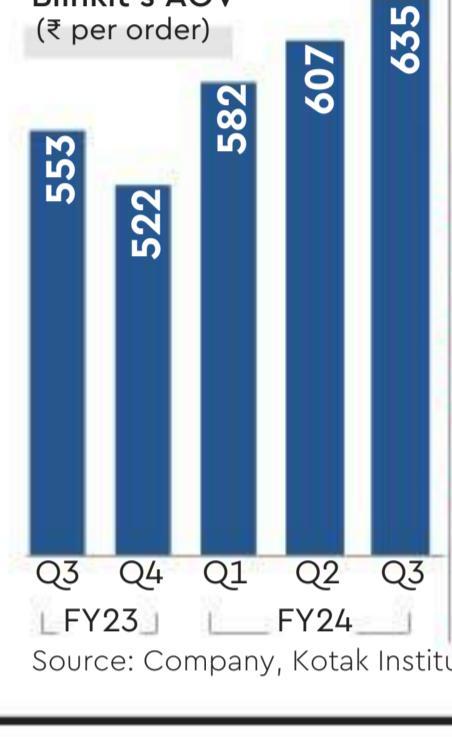

As Garima Mishra and Shubhangi Nigam at Kotak Institutional Equities explain, this strategy of adding newer categories helps the platform corner a higher share of the customer's wallet and also helps retain customers. "Second, it improves AOV as the customer purchase basket becomes more diversified," they say. Abhishek Banerjee of ICICI Securities points out that while the ordering frequency of categories such as electronics, toys, books, beauty products, home décor and gifts during festivals may be lower, their average

THE BIG PICTURE

AD REVENUES WILL BE THE CORNERSTONE OF LONG-TERM PROFITABILITY FOR QC PLAYERS SINCE DIGITAL ADS ON E-COMM OR QC PLATFORMS ARE MORE EASILY TRACKED

A BIGGER CART

Distinct categories' available on quick commerce apps

- | App | Cookware | Crafts & hobby | Bags, school needs | Files, offices needs | Books & magazines | Print store | Bedsheets & towels | Innerwear | Travel essentials | Bags | Apparel (T-shirts, Kurta) | Footwear | Zepto café |
|-----------|----------|----------------|--------------------|----------------------|-------------------|-------------|--------------------|-----------|-------------------|------|---------------------------|----------|------------|
| blinkit | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| instamart | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| zepto | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |

selling price tends to be 3-4x higher.

While Blinkit is the market leader, Zepto, which operates in 10 cities, compared with 25-30 for Blinkit, is becoming aggressive. HSBC's Aggarwal believes Zepto is taking away share from Instamart. "In terms of revenue market share, Zepto's overall take rate is around 22-23% compared to 18-19% for Blinkit and its revenue market share is even higher," he says.

That may be so but Blinkit is taking it step by step because adding categories requires more dark stores and stock keeping units (SKU). In the last couple of years, the company is understood to have increased the SKUs to 6,000-6,500, up from 2,500-3,000 SKUs.

Blinkit's presence in the smaller towns, from where 15-20% of the orders now come from, gives it an edge. As experts say, the first mover in any geography has an advantage as it tends to understand the market nuances. Also, as BofA's Salgaonkar says, the cost of making people try something new is not very

high at around ₹100, but trials don't always lead to a conversion. For instance, the temporary shutdown of Blinkit's services in places like Delhi in March last year did cause a spike in deliveries by the competition, but experts noted 99.5% of this spike retraced as soon as Blinkit was back in business.

Blinkit also has the ability to cross-sell products across its user base. It can gain share from horizontal e-commerce companies in categories such as FMCG products and baby care as well as items of daily use, including kitchenware and basic home furnishing. However, as experts explain, q-commerce companies may not want to manage too many high-end categories since these do call for supply chain management. In the groceries and fresh foods space, however, newcomers are unlikely to be able to dislodge incumbents. In the past, attempts by Flipkart and Amazon to offer q-commerce services haven't succeeded. Currently, Flipkart Supermart and Amazon Fresh and Amazon Pantry

are slotted delivery services.

What experts believe will remain the cornerstone of long-term profitability for q-commerce players is advertising revenues. HSBC's Aggarwal observes that digital ads on e-commerce or q-commerce platforms like Blinkit are a lot more easily tracked compared with other platforms, like social media. As such, companies will likely continue to shift their spend in favour of these platforms.

BofA's Salgaonkar feels this is the key KPI that could drive faster positive unit economics for Blinkit.

"Consumer companies and D2C brands see value in advertising on the platform, given the higher transacting frequency, ability to offer targeted ads and linking ad impressions to actual sales," he notes, adding this helps to accurately measure the RoI. There's merit in this argument; Blinkit's ad revenues, over the past year, have grown at twice the pace at which the gross order values have grown. Dhindsa must be more than satisfied, he's on the right track.

When Musk lands in India, the red carpet for Tesla and a few red flags

ANIL SASI
New Delhi, April 14

WHEN TESLA CHIEF Elon Musk is expected to land in India later this month to announce his electric vehicle (EV) investment plans, he will wish for a red carpet no doubt — but there will also be a few red flags in the wings.

Under pressure in China where local players have outsmarted him, facing tech disruptions in the industry, and a general demand slowdown, for Musk, the India story is as important as the EV story is for India. New Delhi hopes the entry of the marquee EV flag-bearer, just like it was in China, will be a catalyst for its domestic electric four-wheeler push. So much so that after turning down Tesla's demand for upfront import duty cuts two years ago, it believes the latest cuts, with a post-dated investment pledge and progressive localisation targets, are worth it.

The key issues that will frame the talks with Tesla:

Policy rethink: The new EV policy, which effectively lowered import duties to 15% from 100% on car models costing over \$35,000 if its manufacturer promised to invest \$500 million in setting up a local factory, is being seen as a move to welcome Tesla. This marks a part reversal of the domestic manufacturing policy push given that the duty cuts are aimed at enabling a carmaker to import fully built cars made in a foreign country, even though there is an implicit promise of building a factory at a future date backed by bank guarantees, and progressively increasing domestic manufacturing targets.

Tesla had pitched for cars to be imported from its Shanghai factory but given the optics of imports from China, is now likely to get the first lot from its Berlin-Brandenburg factory. This is learnt to be at New Delhi's insistence.

Subsidy structure: The waiver of duties is specifically for models of electric cars with a combined cost, insurance, freight prices of \$35,000 or above — a landed cost of ₹35

lakh or more, a user segment that does not generally qualify for a tax waiver for what is clearly a luxury product. While the import numbers may be limited to 8,000 units annually, the new policy does entail a demand by Tesla of sampling their cars here to test out the "market potential" before it takes a full-scale plunge into manufacturing.

According to the Ministry of Commerce, the new policy is designed to attract investments in the e-vehicle space by reputed global EV manufacturers and seeks to "provide Indian consumers with access to latest technology, boosting the Make in India initiative and strengthening the EV ecosystem by promoting healthy competition among EV players."

Tesla under pressure in China, faces tech disruption; India hopes entry will boost domestic industry

electric cars in last three months of 2023, boosted by a surge in sales of the Chinese carmaker's smaller, low-cost EVs such as its Seagull and Dolphin models.

Battery preference: While the lithium-ion battery tech has been a runaway success at the lower end of India's EV segments, the same cannot be said of the four-wheeler segment. Currently, the Centre offers tax incentives for primarily one category of cars, with practically all other vehicular technological platforms clubbed together towards the upper end of the tax bracket. India's electric mobility plan is largely focused on battery EVs replacing internal combustion engine vehicles for now.
